Achrovid VIDEO MICROSCOPE OBJECTIVES

The Achrovid Series is presently comprised of six long working distance microscope objectives which have been specifically designed for use with video sensors. Maximized for optimum Nelsonian™ contrast/resolution in video applications, Achrovid Objectives represent a significant improvement in high magnification video imaging. An intermediary lens system with 200mm focal length must be utilized with these infinity-corrected objectives (e.g., Infinity's InfiniTube™, Model KC™, Model K2™ or Model KV™).

Achrovid Objectives are mounted in "M" Thread (26mm/Whitworth). Each Achrovid has a 30mm diameter front. This feature allows our #990171 Small Mounting Clamp to be used as an extra point for attachment.
