INFINIGAGE VIDEO/MACHINE VISION LENSES

InfiniGage: The lens that is as precise as YOU want it to be! All the work has been done for you: forget about "formulas" or "experiments." Forget about having to choose from hundreds of possible lenses—all with different characteristics. Forget about never being sure of your setup. InfiniGage is the SINGLE lens that lets you get accurate gaging results—SIMPLY.

The InfiniGage Main Lens Body mates with seven Precision Spacers for SEVEN magnification/working distance choices. You can set InfiniGage PRECISELY to each magnification, lock that in place—and be ready to make accurate measurements. Or, simply get stunning images on your machine vision setup.

You can even put 11.8mm to 12.5mm diameter filters INSIDE InfiniGage (110110) for polarization or color analysis without changing outer dimensions (once selected). All filters can then be locked in place with an accessory retainer. Each InfiniGage can be doubled in magnification by simply adding a DL Doubler Tube and, if you wish, secured by the Small Mounting Clamp. That's IT! Being a machine vision EXPERT was never so EASY!
